

DESCRIPTION AND APPLICATIONS

Guardian's SatinDeco® is an acid-etched glass that offers an excellent surface finish, making it very easy to clean. Thanks to its elegant appearance and great versatility, this glass is ideal for a wide range of applications in exterior: windows, doors, floors and in interior: houses, offices, hotels, public buildings or shops. SatinDeco has become a key component in modern day decoration creating elegant, clear and bright atmospheres

PROPERTIES

■ Appearance and Quality

Top quality float glass is used to manufacture SatinDeco. A granulated surface is produced which diffuses the light and transforms the transparent float into a translucid glass

The characteristics of this acid etched, high quality glass are a rough surface with a smooth feel and a silky appearance

■ Uses

SatinDeco is perfect for decorative applications inside and outside

■ Easy to clean

With its smooth surface SatinDeco is really easy to clean and helps the prevention of finger prints on the glass

■ Types and Colours

Also available in UltraMirror®, DecoCristal® and Double Side. SatinDeco can be laminated with LamiGlass and Acoustic LamiGlass. This process incorporates a PVB layer which is available in the following colours*:

HANDLING

■ Stocking

As with typical float glass, SatinDeco must be stored in a dry environment

■ Processing

It is possible to cut, bevel, curve and drill SatinDeco. It can also be tempered (flat or curved), painted or printed, laminated, mirror-coated and acid-etched on both sides

■ Installation

Similar to standard glass, it can be installed with neutral silicon (free of solvent) or double sided adhesive

■ Cleaning

Can be easily washed using a clean cloth with a standard and non-abrasive glass cleaning product
